# MESSAGE OF RECTOR

Dear Students,

Acibadem University is a young and thematic university in the field of health sciences. Two major forces have driven the establishment and development of Acibadem University: the first is the desire to pass on the experience gained and knowledge accumulated while providing quality healthcare services within the Acibadem Healthcare Group to future generations. The second is the desire of our country's leading academics working within the group to contribute to health sciences through student training and research.

Our university's primary goal is to train knowledgeable, inquisitive, and research-oriented professionals in all areas of health through student-centered, research-encouraging, dynamic, and contemporary education programs. In line with this goal, we place special importance on the infrastructure work necessary to deliver our education at world standards. In all our education programs, our simulation center makes an incredible contribution to students, providing them with dozens of scenarios before they encounter real patients.

We know that the bar in health education is now set at a different level, and Acibadem has raised that bar very high...

We pursue every innovation that will strengthen education, and we will continue to do so. Learning what we don't know is also indispensable for us, but we already teach what we know very well. Our efforts to achieve better will always continue; we will always look to the future with strength, confidence, and hope...

Ahmet Sahin, M.D., Prof.

Rector

# MESSAGE OF DEAN

Dear Students,

The Faculty of Health Sciences aims to ensure that its students' professional knowledge and skills meet international standards. The dynamic and experienced faculty members established to achieve this goal are further strengthened by educators in the fields of basic sciences and clinical sciences.

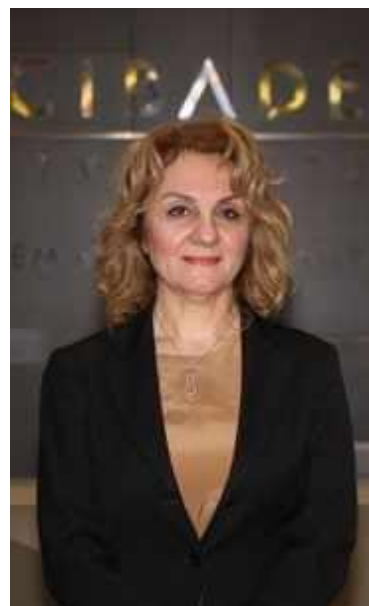

In addition to theoretical education at the Kerem Aydınlar Campus, which has an advanced technological infrastructure, practical training is provided in modern laboratories, and part of the practical training of the Nursing Department is provided at one of the most well-equipped and modern simulation training centers in our country.

In addition to its strong teaching staff and the technological capabilities of the campus, one of the Faculty's greatest strengths is the opportunity for students to conduct the majority of their practical training under the supervision of faculty members and experienced colleagues at Acibadem Healthcare Group's hospitals and health centers, which are equipped with the latest technology.

The primary goal of the Faculty of Health Sciences at Acibadem Mehmet Ali Aydınlar University is to train contemporary health professionals who are competent and well-equipped in their field, think and produce scientifically, are highly skilled in using technology, know foreign languages, and can successfully represent themselves, their institution, and our country in national and international arenas.

With you, we hope to achieve even greater things...  
Murat Ba , Ph.D. Prof. (Dean)

# MESSAGE FROM HEAD OF NURSING DEPARTMENT

Nursing is an applied health discipline based on scientific knowledge. It has a multi-faceted responsibility and role for the individual, family and society in meeting the needs such as care, relaxation, healing and information that people need at every stage of their life process. Nursing interventions applied in today's health care environment are carried out with the use of evidence based on research results. In order to meet the needs of the individual, family and society, the nurse initiates and makes clinical decisions in line with his knowledge. In order for nursing care to be effective, safe and adequate, interventions must be carefully and critically evaluated. All these reveal the necessity of continuing the theory and practice of nursing professional education with contemporary methods, with a philosophical belief in the uniqueness of human beings.

Aiming to train qualified manpower, in Acibadem University Faculty of Health Sciences Nursing Department; As in the training programs of all disciplines based on practice, theoretical knowledge and clinical experience are integral parts that complement each other. At Kerem Aydınlar Campus, which is equipped with modern technology that supports its philosophy, vision, mission and nursing education values, we put it into practice in university hospitals by providing training with simulation laboratories and equipment, where each student can transfer their theoretical education into practice.

As a result, the department aims to train world-class nurses who can provide excellent evidence-based care to the patient/healthy individual.

Ükke Karabacak Ph.D., Prof. (Head)

# NURSING DEPARTMENT PURPOSE, VISION, MISSION AND VALUES

## Our Fundamental Values;

Acibadem University Faculty of Health Sciences Department of Nursing;

- Accepts that the human being as a whole is unique.
- Emphasizes being faithful, reliable and accountable to ethical principles in the services it provides to the society,
- Believes in the superiority of science, adopts a systematic approach,
- Believes in the importance of corporate belonging, effective communication and teamwork in success.

## Education Model of the Program

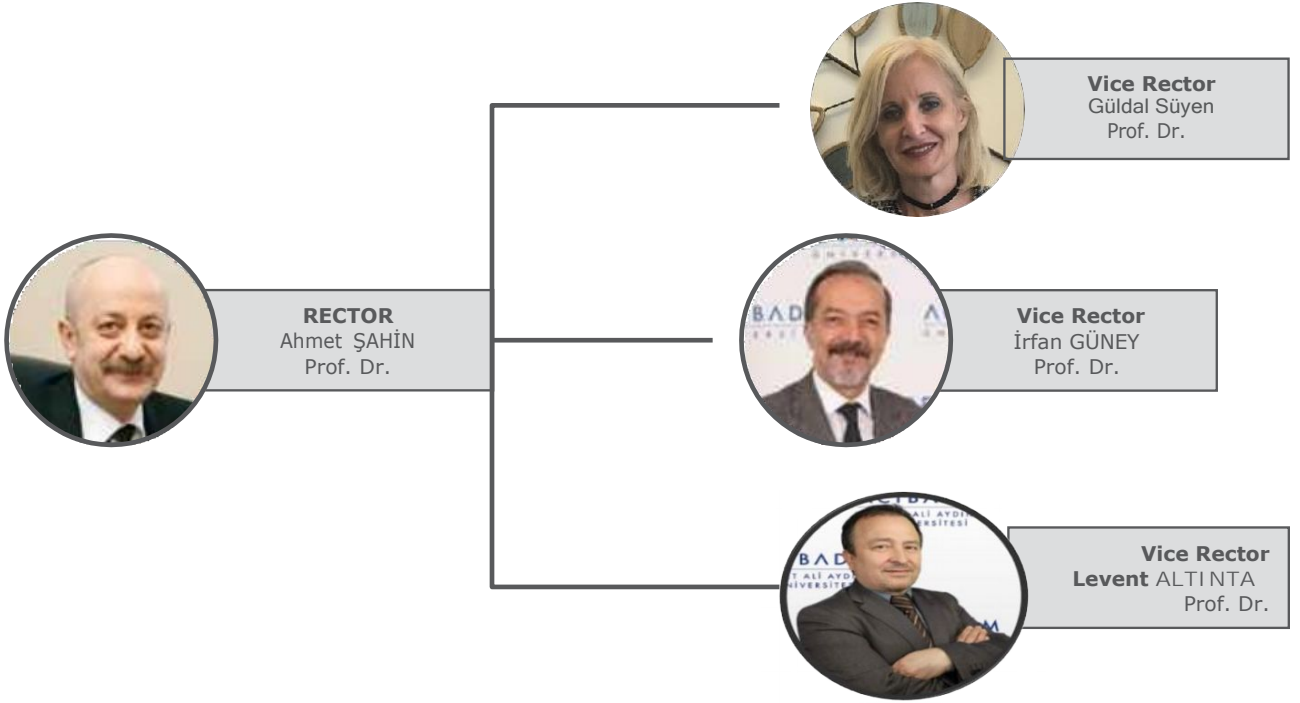

Nursing undergraduate program was created in the "Classical Education Model", which is one of the programs based on the structure of the disciplines. The purpose of the disciplinary programs is to teach the concepts, theories and principles specific to that discipline, research, practice, education and management. In this way, it is essential to integrate, organize, show and develop the limits and gaps of the knowledge that falls within the field of discipline. In the structuring of the Acibadem Mehmet Ali Aydınlar University Nursing Department model, developments in meeting the health care needs of the society on a national and international scale were taken into account. The program consists of theoretical and practical parts of nursing education in the Classical Education Model. Lessons are carried out by academic members / staff who are experts in their fields. In line with the classical education model, all departments include course contents; It is planned within the framework of the main concepts of human, health/disease, environment and nursing and is carried out by using active learning methods to support students' learning at cognitive, psychomotor and affective levels. Different nursing models and theories are used while conducting courses specific to the department. Life Activities-Based Nursing Model, Functional Health Patterns Model, OMAHA System and Orlando's Deliberative Nursing Process and Peplau's Theory of Interpersonal Relations are the models used Collaborative Model.

In this model, nurse practitioners are responsible for teaching and clinical practice under the direction of faculty members. Clinical practice is accomplished by planning periodic and weekly objectives. These objectives are shared by faculty/staff with students and clinical nurse specialists. The nursing process is used as a problem-solving approach in the care of the individual. The "NANDA" diagnostic classification system is used in making nursing diagnoses, planning, implementing, and evaluating care. The principles used in establishing program objectives are listed below.

- Healthcare Undergraduate Core Education Program (HUCEP)
- Higher Education National Qualifications Framework-6
- Nursing Law
- Nursing Regulation published in the Official Gazette No. 27515
- Supplementary Regulation on Amendments to the Nursing Regulation published in the Official Gazette No. 27910
- 26775 "Regulation on the Determination of Minimum Education Requirements for Medical, Nursing, Midwifery, Dental, Veterinary, Pharmaceutical and Architectural Education Programs" published in the Official Gazette No. 26775

## **Library**

The library, which is centrally located on the Kerem Aydınlar Campus, has a collection that supports the academic programmes of the university and the publications mainly consist of Medical and Health Sciences.

There are two branch libraries affiliated to the Central Library of our university, Acıbadem Atakent Training and Research Hospital Library and Acıbadem Maslak Hospital, which serve our academic staff and internship students.

The central and branch libraries have a total area of 1812,82 square metres and a seating capacity of 522 people. The library, which offers its readers a modern and comfortable working environment, is open 24/7 during the academic year. The library has a computer study room and 18 study rooms that users can reserve.

## **Collection**

Our library, which prioritises reader's benefits and publication quality, continues to develop its collection in order to support educational activities, academic studies and intellectual development in this direction.

**Printed Collection:** The Library has 39.146 printed books, printed periodicals, printed theses, CD-Roms, DVDs, etc. in the Central, Atakent and Maslak Libraries.

**Electronic Collection:** With 50 databases subscribed by the library, 61.107 interdisciplinary e-journals, 236.388 e-books, 2,592,727 full-text theses, 127.930 medical and surgical videos, evidence-based medicine database, bibliometric tools and indexes, newspapers can be accessed.

### **Library Trainings**

Library staff provide library training to users upon request and need. In the trainings, information is provided on the use of the library catalogue, access to library databases and searching for academic publications. In addition, author workshops for young academics and graduate students and user training for specific databases can be organised. The ACU Library Skills webinar series enables library users to improve their information literacy skills and make the most of the resources of the University Library. Sessions cover topics such as library services and facilities, using the online catalogue, accessing subscribed databases, mobile access, accessing academic publications, referencing, bibliometrics, assessment and evaluation.

### **Book Purchase Request**

All Members of Acıbadem University can make requests and suggestions regarding the purchase of new books and subscriptions for the library collection. Requests can be made by logging in to <https://katalog.acibadem.edu.tr> or by sending an e-mail to the Library e-mail address.

The ERASMUS+ Program covers projects that enable higher education institutions to provide student and staff (academic and administrative) mobility by establishing partnerships with higher education institutions in the program countries. This activity aims to improve the qualifications of higher education students and staff and to provide these people with professional development opportunities abroad. Thus, increasing the overseas education opportunities of those who continue their higher education or who have recently graduated from higher education institutions and providing them with the skills they need to transition from education to business life; for higher education personnel to obtain business practice knowledge or increase their pedagogical skills.

Acibadem Mehmet Ali Aydınlar University has been carrying out student and staff (academic and administrative) mobility within the scope of the program since 2009. Students, faculty members/staff and administrative staff of the Faculty of Health Sciences can participate in Erasmus+ programs at another higher education institution during certain periods. Acibadem University International Students and Academic Relations Office (IO) organizes an information meeting every year regarding the application periods and processes. Information about applications is announced on our University's website and is also announced to students and staff via e-mail.
